Supersapiens

About the Company

This company is poised to revolutionize sports with bio wearable technology. By leveraging real-time glucose data, they provide actionable insights driving positive behavior change for better performance and recovery.

The Problem Statement

A highly skilled tech team has come together to develop an application that provides glucose readings and insights to improve athletic performance. However, they encounter a significant obstacle in ensuring the validation and verification of their work, which is crucial for delivering a high-quality product.

The Challenge

A highly skilled tech team has come together to develop an application that provides glucose readings and insights to improve athletic performance. However, they encounter a significant obstacle in ensuring the validation and verification of their work, which is crucial for delivering a high-quality product.

The Solution

Spiralogics has contributed by providing robust quality assurance services to ensure the accuracy and reliability of glucose insights and analytics. Additionally, we offered scripts for efficiently feeding test data and conducting comprehensive testing, including both manual and automated methods.

Tech Stack

Tech stack comprises Spring with Java for backend development, Kotlin for Android mobile development, Swift in iOS, and React for frontend development.
